A photograph of a modern, multi-story red brick building with large glass windows. The building is identified by a large green sign on its roof that reads "Hisense R&D". The building is set against a bright blue sky with scattered white clouds. In the foreground, there is a paved road that curves to the right, bordered by a green lawn and some young trees. A semi-transparent dark grey rectangular box is overlaid on the lower half of the image, containing the text "01 | ABOUT US".

01 | ABOUT US

Trusted by millions all over the world

Hisense was founded in 1969. At present, Hisense owns two listed companies - Hisense Visual Technology Co., Ltd. (600060) and HISENSE HA. (SZ000921, HK00921), listed in Shanghai, Shenzhen and Hong Kong. And it also owns many

brands including Hisense, Toshiba, Gorenje, ASKO, Kelon and Ronshen. In 2020, the overseas revenue gained 6.4 billion USD. In 2021, it achieved 11.3 billion USD, with a year-on-year growth of 43%

Global network

With the products exported to over 160 countries and regions, Hisense has sponsored the world's top sporting events such as UEFA EURO 2016 and 2020, and 2018 and 2022 FIFA World Cup. In the China National Image Global Survey released by China International Publishing Group, Hisense was one of the "Top Ten most

familiar Chinese brands to overseas citizens" for five consecutive years. What's more, Hisense is the first batch of innovative enterprises in China and has won the "National Quality Award" twice. Hisense Group has 14 industrial parks, which are located in Qingdao, Shunde, Huzhou, Czech Republic, South Africa, Mexico and

so on. There are also 17 R&D centers located in Qingdao, Shenzhen, USA, Germany, etc. The number of R&D personnel reached 7000 with more than 3000 Master's degree and more than 100 PhD, with which Hisense initially established a global collaborative R&D system.

Technology

Simple and reliable Wi-Fi operation

Wi-Fi control

Control your air conditioner anytime and anywhere conveniently – inside and outside your home using just your Android or iOS device. Simply ensure a comfortable living environment at home at all times.

Intelligent control from anywhere and anytime

ConnectLife APP

Monitor and manage your air conditioner conveniently and easily anytime from anywhere. You can get the status information of your air conditioner, check the temperature and humidity in the room, update cycles for your smart air conditioning or activate intelligent functions and more. The application is available in Google Play and App Store.

Master your life

Smart voice control

The new ConnectLife APP is compatible with Google virtual assistant or Amazon Alexa to lead the smart life. Thanks to voice interaction, it is possible to switch on, off and regulate the temperature, as well as setting the operating mode (cooling or heating).

High-end technology for best performance

360° Full DC inverter

360° Full DC inverter technology is a collection of high-end technology, which realizes intelligent operation of air conditioner and minimizes energy loss. The compressor runs more efficiently and smoothly, the temperature control is more precise, and the unit is quiet.

Improving the efficiency in winter

Outdoor unit chassis heater

Special outdoor chassis heater improves the defrosting efficiency of the chassis in winters and therefore helps to maintain your air conditioner's optimum heating performance throughout the entire season and to extend the unit's life span.

Less Energy, higher Comfort

Economy mode operation

Without complicated settings, the AC immediately enters into energy saving mode to minimize power consumption while providing comfort

Automatic protection

Self-diagnosis

In case of failure, the error code is clearly displayed and easy to repair. In case of system overload, the emergency power off is initiated automatically to ensure safety.

Two ways to suit your needs

Dual drainage

Drainage, electrical and gas connection from either the left or the right side allows easier installation. It is easy to install, and you can choose from left or right to best suit your needs.

Saving the energy

1 W standby

In standby mode, the air conditioning device automatically starts the energy saving mode. Instead of 5 W, only 1 W per hour is used, which means 80 % energy savings.

Manage your energy consumption

Power statistic display

Data about Power consumption of the air conditioner is displayed on the application thus you can check it at anytime and manage your energy consumption to reduce costs.

Turbo mode

Super Cool

The turbo frequency increase technology enables rapid cooling or heating and allows you to enjoy larger airflow, so to feel comfortable in a shorter time.

Intelligent control of temperature, humidity & wind speed

TMS Comfort Control System

Hisense TMS technology is adopted to calculate the indoor environmental parameters which fit to users, based on six dimensions of temperature, humidity, wind speed, thermal radiation, clothing quantity and activity. It intelligently controls room temperature, humidity and wind speed.

Convenience assured

Easy installation

Gas and liquid pipes can be connected when AC hang on the wall with unique easy installation structure, which is convenient and efficient. Easy installation improves installation efficiency up to 35%.

7 protection levels for the longevity

Multi anti-corrosion protection

The exterior housing is protected by hot-dip galvanized steel plate and ceramic baking paint. By double zinc layer, double zinc-iron soluble layer, steel matrix, powder curing layer, ceramic paint layer they form a strong seven-fold protection and greatly extend the service life of outdoor machines.

Wellbeing

In charge of Healthy air

HI-UVC sterilization

The UVC function is responsible for healthy air. The technology have advantage of long life, energy saving, no preheating and environment friendly. It has excellent killing effect on bacteria and viruses thus test reports from SGS laboratory prove that UVC function sterilize more than 99% of S.Aureus, E.Coli and H1N1 in 30 minutes.

*All the test results comes from the test of Hisense HI-UVC function by SGS in a 1 m³ test chamber.

Keeping efficiency high and air clean

Dual self-cleaning

Hisense's patented second generation cleaning technology takes care of indoor and outdoor unit's maximum performance. Purification process via frosting and defrosting cycle and high-temperature drying remove dust, bacteria and oil from the units effectively and easily to keep the air conditioner clean and safe.

Eliminates the bacteria and brings you fresher air

Hydrophilic and anti-virus aluminum fin

Special painting formula on the evaporator, highly enhance the function of antibacterial and dust clearance.

Clear air delivery system

Cold plasma generator

Cold plasma technology is a unique technology that deters odors and is a great clear air delivery system. Plasma dramatically reduces the harmful contaminants in the air and takes care of your well-being.

Protects your home and your health

HI-NANO

HI-NANO can effectively remove viruses and bacteria including Coronavirus (COVID-19) by releasing high concentration ions, creating a healthy environment and protecting health. HI-NANO has been proven to remove 92.6%* H1N1 and sterilize 88.54%* of E.coli in 2 hours. The Healthy high-concentration ions also can effectively remove airborne dust as HI-NANO has been proven to remove 60.07%* of PM2.5 in 2 hours, purifying the air around you. The HI-NANO technology has been proven safe and has been authorized to apply the UL mark.

Fresh air every day

Fresh Air Technology

Due to the patented Fresh Air technology, the Hisense Fresh Master refreshes the whole room in just 3 minutes by introducing fresh and purified air from outdoors at a rate of 50m³/h. It detects CO₂ concentrations automatically, and signals the air quality on an LED display.

Energy saving, low carbon and environment friendly

Green and Safe refrigerant

The R32 is environment-friendly refrigerant with a higher cooling capacity at the same volume, thus less refrigerant is needed in every device. Advantages of R32 refrigerant are: zero impact on ozone in the air, 66% lower GWP (impact on global warming) than gas R410A, higher energy efficiency, high thermal conductivity and cooling capacity.

High quality air assured

Multi-layer air purifying technology

Air travels through multiple filters and each has the function to provide you with better and healthier air. The most common filters in our ACs are Vitamin C filter, Catechin filter, Silver Ion filter and HEPA filter.

HEPA filter

A highly efficient HEPA filter, which captures 80 % more of dust particles than classical filters, ensuring even fresher and purer ambient air.

Vitamin C

Vitamin C filters are an added protection that provides extremely clean air. Such pure air is healthy for the skin, as it does not cause itching, softens the skin and reduces stress while providing therapeutic benefits.

Silver ion filter

Silver ion filter is a highly efficient sterilizing filter that effectively stops bacteria from growing.

Catechin filter

Catechin is an extract from green tea, which, thanks to its oxidation and sterilization effects, is added to the filters. Active enzymes create a benzene core that absorbs unpleasant odor and harmful substances in the atmosphere. The catechin filter intercepts and sterilizes dust particles effectively and in the long term. Its antibacterial effect destroys more than 95% of bacteria.

Absorbs particles and unpleasant odour

Active carbon filter

The Active Carbon filter includes a charcoal which in addition to particles, captures also chemicals, fumes, and cigarette smoke. Thus, it is the perfect solution to absorb and remove the air unpleasantness, so you can enjoy the fresh and clean air.

Prevents mildew accumulation

Mildew proof

After turning off the air conditioner, the indoor fan will keep running for additional 30 seconds to dry the evaporator. With preventing mildew accumulation on the evaporator, you will keep the air healthy.

Comfort & practicality

Follow

Avoid

Optimum air distribution

Follow/Avoid mode

The left and right independent air deflector design allow the user to control the wind by remote. The wind will follow or avoid people, so one will feel perfectly comfortable all the time.

Smart sensing for perfect air deliverance

Smart eye

The smart eye senses the position and heating flow information of human body and accordingly, adjusts the wind direction of the air conditioner. The wind will thus be smartly delivered to the user's area, so that one feels perfectly cool.

Managing air purity easily

Air Quality display

A special sensor is detecting the CO₂ concentration in the room, signaling you the quality of the air you breathe. The red icon indicates poor air quality, yellow indicates average quality, and green icon indicates good air quality. In case of red air quality, just turn on the Fresh air function and regain fresh air.

Automatic louver swinging

4D auto swing

By automatic movement of horizontal louvers in a specific order, the device ensures optimum distribution and flow of cool or warm air through the room in all four directions. The remote controller can also set fixed louver angle thus variety of air supply options to meet different needs.

Saving time with easiness

Easy maintenance

With the new indoor machine structure, you have no need to move evaporator when disassembling indoor electromechanical machine. Maintenance and efficiency are thus much improved.

Intelligence that works with you

AI Smart

With just one button, you can wake up the intelligent air steward and control temperature, humidity, wind direction and air volume in an all-round way. There is no need to worry about how to use the air conditioner, AI will do it for you.

Save energy & keep your home from freezing

8°C heating

In chilly winter, the special heating mode keeps your home from freezing, by maintain it at 8°. When you are away from home for long periods, you will save energy, protect the furniture and water pipes, or offer the comfortable situation for the pets.

Super heating capacity

Heating at - 25°C

Being able to provide heat in - 25°C ambient is supported by our preheating technology and electric heating chassis technology. You will enjoy the sunny warm with perfect heating capacity in chilly winter.

Best temperatures for everybody's vital sleep

Four sleep modes

Sleep is vital for our body and resting comfortably brings benefits for our health. Selectable sleep modes are providing different sleep temperature, caring for all family members: adult, elderly, youth, children. The temperature curve will adjust automatically and intelligently, so you can fall asleep comfortably.

Night mode operation

Sleep mode

This function enables automatic increasing of set temperature by 2°C after one hour of operation. The temperature then remains constant and you can benefit from a comfortable sleep environment.

Reducing noise to your convenience

Silent operation

The noise lowers to 18dB (A), helping to give you a quiet and comfortable environment, making you feel like a walk on the moon.

Preset daily mode operation

Timer 24 h

You can set a specific time during the day to have the AC automatically turned on or off. No worries, just a simple pleasure of all-ways being in right temperature.

One click for perfect room temperature

Smart mode

Just press the "Smart" button and the air conditioner will automatically adjust to the most comfortable temperature according to the room temperature.

Adjusting the temperature with remote

I FEEL

The remote control measures the room temperature and relays the information to the unit. Not only the indoor temperature, but also the temperature around the user is transmitted to the indoor unit through the sensor on the wireless remote control. The indoor unit is operated and adjusted according to the perceived temperature to achieve intelligent temperature control in the room.

Enjoy 3-in-1 solution

Multi-function

Hisense portable air conditioner is more than just an air conditioner. It can also be used as fan in hot summer days or dehumidifier in wet areas of your home. This 3-in-1 solution (AC + Fan + Dehumidifier) saves you money and living space.

Cool anytime

Super Cool

Powerful air conditioner with high cooling capacity and strong air circulation, thus it will provide cool ambient anywhere and comfortable summer experience.

Intelligent and convenient

Smart Mode

Smart mode automatically set the operation mode according to the ambient temperature, such as Cooling, Heating, Humidification and Fan, which is intelligent and convenient.

Enjoy the coolness where you like

4 Casters for Easy Moving

4 casters makes it easy to move, exactly wherever you need it, thus moving cool air and refreshing the whole room or even apartment.

Even for the most sensitive ears

Quiet Mode

By pressing the "silent" button on control panel, you will reduce the noise for 5 dB. Very useful in the night time, meeting rooms or in the childrens rooms.

Outstanding construction with different installation options

Compact design

Hisense multi-outdoor are the most compact, thus they are lighter and smaller. The more compact design, makes packaging more efficient, more units can be uploaded on the transportation, it makes the installation easier and it saves precious space and looks more beautiful.

Individually controlled indoor units all connected to one outdoor unit

1 Drive 5

The multi outdoor unit can be matched with up to 5 indoor units, depends on the model. The indoor units can be from different type to suit various project requirements from wall mounted, cassette, duct, console and ceiling&floor. Each indoor unit can be set to different temperature, can be controlled and turned on or off separately.

High efficiency

FULL DC Inverter

The compressor, and both the indoor and outdoor fan motors are now all FULL DC, which means a much quieter and more efficient operation. No more extra noise pollution and overspending on electricity.

Save time and energy

Hi-checker

If the error display doesn't help to solve the problem, then the AC can connect to Hi-Checker to monitor the product parameters and diagnostics data, including discharge temperature, indoor coil temperature, outdoor coil temperature, etc. the data can be recorded and stored for later analysis. The Hi-Checker port is easy to access and therefore it can be connected very quickly.

Professional solution for all year cooling

Low temperature (-15°C) cooling

The AC can meet the cooling demand even when the outdoor temperature is -15°C degrees. This is very beneficial for specialized rooms that need constant cooling such as server rooms.

Super heating capacity

Low temperature (-20°C) heating

The AC heating function operates normally even when the outdoor temperature is low as -20°C.

Save energy & keep your home from freezing

8°C heating

The outdoor unit can support the indoor unit to enter 8°C HEATING mode. 8°C HEATING mode is a special feature for wall mounted indoor units. When pressing 8C heating bottom in the remote controller the AC will maintain the room at 8°C ambient temperature. This is great feature to prevent your home from freezing in the winter, when you're away from home for long periods or if the pets are home alone.

Improving the efficiency in winter

Bottom e-heater

AC with Bottom E-heater prevents the bottom plate from freezing in winter, maintain to AC in good condition and extend its life span.

Safety is first

Leak detection

The outdoor unit monitor the refrigerant level and can detect refrigerant leakage. In case leakage was detected an error code will be displayed and the unit will stop running to ensure safe operation of the air conditioner.

Stable heating for the entire winter

Compressor e-heater

New designed compressor electric belt to protect the compressor the let it still run stably in severely cold regions.

Compact Design

Round Flow

Fresh Air Intake

High Ceiling

HI-NANO sterilization
(optional)

Keep your room spacious

Compact Design

The compact design with body thickness of only 215 mm reduces the ceiling height. The compact design makes the most slim design in class.

Easily installed and beautiful

620x620 Panel

The 620x620mm panel is very fit for the standard decoration panel, without covering other things. So it can be beautiful and easily installed.

Next level experience

Round Flow

360°Round Flow can give optimum efficiency and comfort. Full-flat panel and micro-channel design allow smooth air supply and ensure the best comfort.

Easily adjusted to your wishes and needs

High Ceiling

When the ceiling is high, the unit parameters can be set through the wired controller to compensate the installation height, so that the cool air can blow down to people's activity area.

Outdoor freshness in the comfort of your home

Fresh Air Intake

The function of Fresh Air Intake will introduce the outdoor fresh air into the room to improve indoor air quality.

Note: The proportion of fresh air volume cannot exceed 20% of the total design air volume.

Duct

Slim Design

Flexible Installation

1 Pa ESP Setting

Built-in Drain Pump

Great for all types of places

Slim Design

The slim duct unit, with a thickness of only 190mm, makes it no longer a challenge to narrow ceiling voids. The external static pressure of up to 50Pa facilitates unit use with flexible ducts of varying lengths.

Safe operation

Float Switch

The float switch can ensure the water always under the safety level, even if the pump failed or the drain is blocked. This is double insurance of no water leakage disaster. Hisense duct units are all standard with float switch. The drain pan of Hisense is big enough for containing all the water returned from the drain pipe in suddenly power off.

Different air suction options

Flexible Installation

Air suction direction can be altered from rear to bottom suction, giving a choice between free use and connection to optional suction grilles.

Note: The rear suction is 5dB lower than the bottom suction, so it is recommended to use the rear suction.

Highly accurate flow remote control

1 Pa ESP Setting

Possibility to change ESP via wired remote controller allows optimisation of the supply air volume. And the adjust precision of 1 Pa can give the most accurate ESP setting in class.

Breath clean air and stay Healthy

Filter

Hisense Duct units are all standard with nylon filter. The long-life filter can reduce the replacement and cleaning times. The filter is washable so that the dust can be easily washed off from the filter.

Suitable for all requirements

Inner High Lift Pump

The maximum lift of Hisense high lift pump components can be as high as 1200 mm.

* In order to ensure smooth drainage in long-term operation, the recommended drainage height is ≤800mm.

Ceiling suspended

Several
Installation Modes

4D Airflow

WiFi Easy

High Ceiling

Positioned so it suits you best

Several Installation Modes

Ceiling & Floor unit adopts a special structure which can meet seat, lifting and inclined installation mode. What's more, piping can be arranged in four directions, left, right, rear, and bottom.

Easily adjusted to your wishes and needs

High Ceiling

When the ceiling is high, the unit parameters can be set through the wired controller to compensate the installation height, so that the cool air can blow down to people's activity area.

Comfortable air flow even in wide rooms

4D Airflow

The horizontal and vertical air flow swings can provide better room comfort. Ideal for comfortable air flow in wide rooms:

- up to 90° discharge horizontal angle
- up to 65° discharge vertical angle

Easy wifi handling

WiFi Easy

WiFi module can be fixed easily in multiple optional positions of the indoor unit with 3M double-sided tape. The installer can flexibly determine the installation location of the WiFi module according to the strength of the WiFi signal.

Elegant, Beautiful state-of-the-art design

Sleek Smooth Design

Shiny white cover panel of the unit has a streamlined elegant aesthetic. The bolts and nuts used to secure the unit onto wall or ceiling are designed to be concealed in the unit for a sleek room interior look.

Streamlined elegant aesthetic

The bolts and nuts designed to be concealed in the unit.

Suitable for small and large spaces

Airflow 15m distance

The airflow can be up to 15m distance. People can enjoy comfortable airflow even in large spaces.

Large air volume and fast cooling.

Long-distance air supply up to 15 m.

Display

Effective
Heating

HI-NANO sterilization

Better air and comfort delivery

Dual Vane Design

The unique dual vane can be completely sealed when the unit is off, and can rotate independently when the unit is on. The console unit can give a comfortable airflow distribution.

Dual vane can be
completely sealed

Single Vane

Dual Vane

Different air distribution options

Several Airflow Modes

Various air-out combinations of top air-out, bottom air-out and top-bottom make the room air distribution and temperature more comfortable.

Tailored to your needs

Flexible Piping

Both refrigerant and drainage pipes are freely to connect in any direction including any sides.

The left side is against the wall.

The right side is against the wall.

The wall is under the machine.

The wall is behind the machine.

Comfortable environment in the cold days

Effective Heating

The hot airflow blowing from the bottom air-outlet can give an effective heating even with the same heating capacity, namely Foot Warming Effect.

Feeling Temperature (°C)

* Bottom Air-out : Small temperature difference between upper and lower.

Discrete, yet easy to read

LED Display

The 88 LED hidden display makes the console unit simple and beautiful.

A photograph of a modern office interior. On the left, a tall, silver floor-standing air conditioner stands on a light-colored wooden floor. The background features a long hallway with glass-walled offices and wooden frames. The ceiling has several long, recessed fluorescent light fixtures. The overall aesthetic is clean and contemporary.

Main features

Fresh air

AI Smart

I feel

HI-NANO
sterilization

Fresh air, better life

Fresh Air

When the windows are closed, the carbon dioxide concentration in the indoor air is too high, which is not good for health. Fresh Air feature introduces fresh outdoor air into the room and refreshes the whole room in just few minutes through layered purification, making people full of vitality.

No more hassle with settings

AI smart

Automatically adjust temperature, humidity and air airflow according to the room conditions to keep you comfortable in every moment.

It keeps you healthy

HI-NANO

Ion technology that generates 1 million/cm³ Ions and effectively removes bacteria and viruses from the air, including SARS-COV-2 (Coronavirus) within 2 hours.

Cleans the Air conditioner for you

Self-Cleaning

With Hisense new generation hydrophilic painting film, the accumulated dust/microorganism/oil are removed from the aluminium surface of the indoor unit via a frosting and defrosting cycle.

06 | CONTROL SYSTEM & ACCESSORIES

Controllers

YXE-C01U1(E)

Standard controller for duct air conditioners and optional for other air conditioners.

YXE-E01U(E)

New compact wired controller, with large screen and touch buttons. it supports 0.5°C temperature accuracy display and optimized functions, for Example, Individual air flow.

YJE-C01T(E)

Central controller that can control 16 IDU's via B544(E)

RCH-RVD01

Remote controller dedicated for Cassette air conditioners with support for individual vane function

RCH-RTY3

Remote controller for Fresh Master, Energy Pro Plus and Energy Nordic air conditioners with advanced functions as for example Fresh Air, AI Smart, HI-NANO.

R2-01-1

Remote controller with support for HI-NANO and HI-UVC functions.

R2-01

Remote controller with basic functions, as airflow direction control, temperature settings, etc.

L1-12

Remote controller with support for 4 sleep mode function.

J1-91

Remote controller for Portable Air conditioners.
